<b>Virginia</b>	<b>Clinch River</b>	3,851,902,000	5,009,605	2,532,814	1,683	449,656	290	2,984,443
	<b>Glen Lyn</b>	1,422,448,000	1,778,585	509,295	281	28,303	228,109	765,988
<b>West Virginia</b>	<b>Amos</b>	12,195,152,000	15,368,496	14,552,282	6,569	956,399	1,527,519	17,042,769
	<b>Kammer</b>	3,159,390,000	4,255,982	4,866,543	46,900	354,210	2,688	5,270,341
	<b>Kanawha River</b>	1,895,636,000	2,371,667	2,061,822	6,580	0	356,847	2,425,249
	<b>Mitchell</b>	7,029,986,000	8,956,205	9,734,269	14,405	1,485,770	7,811	11,242,255
	<b>Mountaineer</b>	5,643,802,000	7,348,296	6,422,850	2,328	1,120,902	1,323	7,547,403
	<b>Sporn</b>	5,484,852,000	6,859,811	4,592,809	5,351	1,170,770	2,631	5,771,561
<b>AEP System (a)(b)(c)(d)(e)(f)(g)(h)(i)(j)</b>		153,461,954,000	164,153,515	85,782,471	218,364	22,260,995	2,179,664	110,441,494

Notes: (a) AEP System TRI reportable numbers include 1,230; 441; 264; 151 and 95 megawatts of generation capacity owned by others at Cardinal, Conesville, Flint Creek, Oklaunion and Pirkey power plants, respectively. Numbers do not include 262 megawatts of generation at Dolet Hills power plant (located in Louisiana, 650 megawatts total) owned by AEP and operated by CLECO.

(b) U.S. EPA only requires reporting of airborne forms of hydrochloric and sulfuric acid.

(c) AEP will report chlorine and ethylene glycol to the TRI on a "Form A" report at a number of plants. The Form A report is used when less than 1 million pounds of a substance is managed at a reporting facility and when less than an estimated 500 pounds of the substance is released to air, land or water.

(d) U.S. EPA reporting rules require that the Conesville coal preparation plant be combined with the Conesville power plant as a single reporting facility.

(e) U.S. EPA reporting rules require that Southern Ohio Coal Company's Meigs mines #2 and #31 be combined with the Gavin power plant as a single reporting facility.

(f) U.S. EPA reporting rules require that Central Ohio Coal Company's Muskingum mine be combined with Muskingum River power plant as a single reporting facility.

(g) Actual reportable release estimates submitted to the U.S. EPA and state agencies may be slightly different due to completion of this table prior to the July 1, 2001 filing deadline for calendar year 2000. The differences may be mostly attributable to rounding differences.

(h) Transfer includes quantities of the chemical substance sent off-site for disposal and may include some transfers off-site for recycling.

(i) Fourteen power plants in Arkansas, Louisiana, Oklahoma and Texas that are primarily fueled by natural gas will report quantities of benzo(g,h,i)perylene, mercury and PACs totaling, in sum, less than two (2) pounds.

(j) Reflects changes in revision submitted for Coletto Creek 6/25/02
